Form property types	
Form values	
Form examples	Basic concept
	Change the state of text input components based on the checkbox selection
	Mark a form field as mandatory if a value entered in another field meets a condition
	Display assets only from a selected domain
	JavaScript in expressions
	Create a workflow with dynamic forms
	Edit an out-of-the-box workflow
	Change the process model properties
Managing workflows in Collibra	Out-of-the-box workflow deployments
	Deploy a workflow
	View and edit workflows
	Enable or disable workflows
	View and edit workflow definition settings
	Workflows title bar
	Configuration variables
	Edit configuration variables
	Duration variables
	Translating workflows
	View running workflow instances
	System instances
	Delete workflows
How to manage the new workflow permissions	
Out-of-the-box workflows walk-throughs	Approval Process
	Assign Owner To Data Set
	Cancel Process

	Escalation Process
	Issue Creation
	Issue Management
	Issue Move
	Post Data Ingestion Workflow
	Propose New Business Asset
	Propose New Business Term
	Propose New Code Value
	Propose New Data Asset
	Propose New Governance Asset
	Propose New Technology Asset
	Request Assets Access
	Simple Approval
	Voting Sub-Process
